

## CCD Transport File Layout

The following is a list of specifications for various fields to be imported into the Consumer Loan Transport. The import file format is standard ASCII text file with individual fields delimited by a comma.

A decimal point must be supplied for all numeric values where applicable. Fields for which there is no data available can be denoted with adjacent commas - no spaces. Individual records are distinguished by a return line feed.

Specific information on numbered individual fields can be found in the database section of the Consumer Loan online documentation.

### File Layout Format

The following information is included in the file:

<b>Item Number</b>	A sequential number assigned to each field in the Consumer Loan Transport input record
<b>Field Name</b>	Descriptive name for the information stored in this Transport field
<b>Type</b>	Type of information stored in this Transport input field. Values are: N = numeric A = alphanumeric
<b>Size</b>	Length of the Transport input field; includes the decimal position, if applicable
<b>Format</b>	Predefined format required for this Transport input field
<b>CCD Fld #</b>	Fiserv servicing application field number corresponding to this Transport input field, if applicable
